

MyClinic365 Release Notes V2.14 28072020

1) Calendar update - Payments

Since the introduction of payments and click to pay functionality MyClinic365 users have been asking for a quick way to view if a patient has paid or not. This release will add this functionality. You can quickly view on the calendar whether the patient has paid or not.

For this to work accurately it is important that the correct pricing is set for GMS patients in services. If there is no charge for a service, then set the cost to €0.
