

MyClinic365 Release Notes V2.22 22102020

Release notes for changes deployed on the 22/10/2020

Chatbot lag

Each practice can now decide the time lag for booking appointments through the chatbot. Currently its is set to 15 mins but this can now be set from 15 mins – 120 mins. This determines the soonest available appointment time that the chatbot shows from the current time.

To change it go to settings/Chatbot Time-Lag

The screenshot shows a dialog box titled "Chatbot Time-Lag" with a close button (X) in the top right corner. Inside the dialog, there is a light blue informational box with the heading "What is the Chatbot Time-Lag?". The text explains that when booking an appointment through the chatbot, the "As soon as possible" (ASAP) option is chosen. Time-Lag is defined as a time quantity added to the current time, after which the first ASAP slot can start. An example is given: if the time-lag is set to 15 minutes and the current time is 1PM, the first ASAP slot can start at 1:15PM. It also states that the Time-Lag value must be between 15 and 120 minutes. Below the informational box, there is a text input field with a "minutes" label and the value "15". At the bottom of the dialog, there are two buttons: "CANCEL" and "SAVE".

Set Chatbot Hours

Many of our customers have been asking for more granular control over the chatbot. We have now created a new Set Chatbot Hours function that allows a practice to control the times a chatbot presents available slots for each service.

To enable this, select the service you wish to edit. If show in chatbot is enabled in rules for that service, then a new radio button is presented 'Chatbot Different Hours'.

The screenshot shows a configuration panel with the following elements:

- Hours:** A dark button labeled "SET SERVICE HOURS" with a calendar icon.
- Duration in minutes:** A text input field containing the number "15" with a sandglass icon on the left.
- Rules:** Two toggle switches:
 - "Show In Chatbot" (currently turned on)
 - "Chatbot Different Hours" (currently turned off, underlined in red)

When this radio button is enabled it then pops a new button to set chatbot hours. From here you can define availability by day, hours, breaks etc for that service controlling what is presented to the patient through the chatbot.

The screenshot shows the same configuration panel as above, but with an additional section:

- Hours:** "SET SERVICE HOURS" button.
- Chatbot Hours:** A new dark button labeled "SET CHATBOT HOURS" with a calendar icon, appearing below the main hours button.
- Duration in minutes:** Text input field with "15" and sandglass icon.
- Rules:** Two toggle switches:
 - "Show In Chatbot" (turned on)
 - "Chatbot Different Hours" (turned on, underlined in red)

Summarised Terms and Conditions

You can now add summarised T&Cs, links etc in the registration flow.

To enable go to Settings/Practice Details

Summarized Terms and Conditions
